OBJECTIVE

Goal-focused and solution-oriented professional with a proven track record in JavaScript development, software development, and front-end engineering. Proficient in translating UI/UX design wireframes into reusable code, websites, and applications. Offering expertise in JavaScript, HTML, CSS, and cutting-edge web technologies. Seeking a challenging position as a JavaScript Developer, Software Developer, or Front-End Engineer to leverage my skills and contribute to innovative projects.

EXPERIENCE

Roman Lab, LLC - Charleston, SC
Owner | 2010 – Present
- Drove the end-to-end development of dynamic and interactive websites using state-of-the-art web technologies, including JavaScript, HTML, and CSS.
- Collaborated closely with clients to gather project requirements, understand business objectives, and transform them into functional and visually appealing website designs.
- Managed a team of freelance designers, ensuring streamlined project execution and adherence to quality standards.
- Created custom themes and templates, delivering responsive designs and exceptional user experiences across various devices and browsers.
- Implemented JavaScript frameworks such as React, Angular, and Vue.js to elevate website functionality and interactivity.
- Integrated third-party APIs and services, enabling seamless data retrieval and real-time updates.
- Performed comprehensive testing, debugging, and optimization to deliver high-performance websites.
- Ensured adherence to web development best practices, including accessibility standards, cross-browser compatibility, and search engine optimization (SEO).
- Provided ongoing maintenance and support, promptly addressing client requests and troubleshooting technical issues.
- Remained up to date with emerging trends and advancements in web development, incorporating innovative techniques to deliver cutting-edge solutions.
- Actively participated in client meetings and presentations, offering expert advice on web development strategies and proposing enhancements to achieve business goals.

TECHNICAL SKILLS

- JavaScript: Proficient in leveraging JavaScript to build dynamic and interactive web experiences.
- HTML: Expertise in writing clean and semantic HTML code for structuring web content.
- CSS: Strong skills in creating visually appealing and responsive designs using CSS.
- React, Angular, Vue.js: Experience in implementing popular JavaScript frameworks to enhance website functionality.
- MS SQL: Familiarity with MS SQL for efficient database management.
- Websites Deployment: Proficient in deploying websites to production environments.
- Hosting Server Setup and Configuration: Capable of setting up and configuring hosting servers for seamless website performance.
- Hosted and Exchanged Email Servers' Setup and Configuration: Skilled in setting up and configuring hosted and exchanged email servers.
- WordPress: Knowledge of WordPress for developing dynamic and customizable websites.
